

Kimaya Ahire

Software Engineer · AI/ML Developer · Hyderabad, India

ahirekim.2444@gmail.com · +91 80748 12795 · github.com/Kimayaahire · linkedin.com/in/kimaya-ahire-494291292

SUMMARY

Final-year CSE undergraduate crafting AI-powered software solutions. Experienced across the ML pipeline (regression, classification, clustering, RAG, agentic AI) and core software engineering with Python, Java, and SQL. Open to Software Engineering and AI/ML roles.

EDUCATION

B.Tech, Computer Science & Engineering — KG Reddy College of Engineering and Technology (2022–2026), CGPA 8.0/10

Senior Secondary — Aakash Institute, 2022, 83% · Secondary — International School Shaikpet, 2020, 70%

SKILLS

Languages: Python, Java, SQL

AI/ML: Machine Learning, Model Training, Feature Engineering, Regression, Classification, Clustering, RAG, Agentic AI

CS Foundations: Data Structures & Algorithms, DBMS, OOP, Computer Networks

Tools: Git, GitHub, Google Colab, Java Swing

PROJECTS

AI Carpooling Platform (Jul 2025 – Apr 2026)

ML ride-matching on route similarity, preferences, and safety signals. Python ML pipelines, verification & trust mechanisms.

Smart Property Discovery (Jul 2024 – Apr 2025)

Real-estate price prediction & trend forecasting using regression and engineered features.

Travel Destination Recommender (Jul – Sep 2023)

Compared KNN, Random Forest, Decision Tree to recommend destinations from user preferences.

Expense Tracker — Java Swing (Apr – Jun 2023)

Console + GUI expense manager with OOP design and automated summaries.

EXPERIENCE

Management Trainee Intern — Samyak Eco Solutions LLP (Dec 2025 – Apr 2026)

Tested internal dashboards, authored technical documentation, handled client correspondence.

Agentic AI: Learner to Builder — IBM SkillsBuild × CSRBOX (Jul – Aug 2025)

Agent architectures, prompt engineering, RAG, context-aware assistants.

Mastering Data with ML — IBM SkillsBuild (Oct – Nov 2024)

End-to-end data science with supervised/unsupervised methods.

AI Job Simulation — Cognizant Forage (Jul 2024)

EDA on retail supply chain data and ML model evaluation.

Technology Job Simulation — Deloitte Forage (Jul 2025)

Requirement analysis, planning, scenario-based engineering.
